PROFILE

My real-world experience in the field of IT, along with my ongoing pursuit of a bachelor's degree at Monash University, has equipped me with proficiency in software and web development, UI/UX design, and data analytics. I am eager to apply my blend of technical and soft skills to tackle exciting projects and challenges in the IT industry.

- Monash University Graduation Events Ambassador
- High Distinction Average

Diploma of Information Technology

Monash College | Jakarta, Indonesia   Jun 2022 – Feb 2023

- High Distinction Average

PROFESSIONAL EXPERIENCE

Front-End Developer Intern

Indofood CBP | Jakarta, Indonesia   Mar 2023 – May 2023

Indofood is the largest food company in Indonesia, also known as the company behind the globally popular Indomie instant noodles. As a front-end developer intern, I joined a team of talented individuals working on the development of the online ordering website for the international operations division. The goal was to facilitate easy online ordering for distributors of Indofood products worldwide.

- Translated Adobe Illustrator prototypes into functional components, including order placement, draft saving, transaction history, product catalog, and profile management, using React.js, Bootstrap 5, and Chakra UI.

- Collaborated closely with a back-end developer to facilitate API calls to a SQL database using Axios.
- Adhered to the SCRUM framework, actively participated in bi-weekly presentations to division leaders for project updates, and integrated their feedback to enhance the website.
- Attended development team meetings with the logistics team to discuss ordering rules and project direction, and participated in code reviews to ensure the website's smooth operation.

VOLUNTEER EXPERIENCE

Web Developer & Designer

DART Group Australia | Perth, WA   Nov 2023 – Present

The Domestic Abuse Resource and Training (DART) Group is the leading organisation for domestic family violence and sexual violence training and consulting in Western Australia. In support of their commendable cause, I am volunteering to develop and design their website, which aims to raise awareness of their training programs and consultation opportunities.

- Designed a medium-fidelity prototype of the website using Figma and iteratively enhanced it based on feedback from the clients.
- Currently developing the website using WordPress and Elementor, incorporating advanced custom fields for content management, and implementing a custom theme coded in HTML, CSS, JavaScript, and PHP.
- Actively presenting the website's progress weekly, adhering to the Agile approach and closely involving the clients.

TECHNICAL SKILLS

- Object-oriented programming: C++.
- Web development: HTML, CSS, JavaScript, TypeScript, PHP, React, Next.js, Node.js, MongoDB, Express, Tailwind, SASS, Bootstrap, Chakra UI, and WordPress.
- UI/UX design: Figma.
- Data science: Python, R, Unix, and Tableau.
- Project management: Git and Trello.
